SUMMARY

Designs, develops and maintains AI Agents using firm's AI agent platform and orchestration tools, integrating with internal and external applications via APIs to support agent workflows and process automation; builds and supports process automations using Power Automate, Zapier and Workato to streamline routine tasks and cross-system activities; collaborates with stakeholders to gather requirements, define outcomes and iteratively improve solutions.

CORE SKILLS

API integration - automation logic - responsible AI development practices - Power Automate - Zapier - Workato - cloud-based platforms - SaaS integrations - data privacy - security - access control - JavaScript - TypeScript - Python - AI/ML development - process automation tools - cloud infrastructure components - legal-specific applications - software developer experience

EXPERIENCE

AI Solutions & Automation Developer - Fisher Phillips, Atlanta, GA (Full-time, Hybrid)

- Designed and developed AI Agent using firm's platform and orchestration tools; integrated with internal application via API to support agent workflow
- Built and supported process automation using Power Automate, reducing manual toil by 150 hours/quarter
- Collaborated with stakeholders to gather requirements and define outcomes for agent development
- Automated data processing tasks using Python and secure programming practices
- Implemented data privacy and security measures in agent workflow

AI Solutions & Automation Developer - Fisher Phillips, Atlanta, GA (Full-time, Hybrid)

- Developed and maintained AI Agent using firm's platform and orchestration tools; integrated with external application via API to support agent workflow
- Built and supported process automation using Zapier, reducing manual toil by 100 hours/quarter
- Collaborated with stakeholders to gather requirements and define outcomes for agent development
- Automated data processing tasks using TypeScript and secure programming practices
- Implemented data privacy and security measures in agent workflow

AI Solutions & Automation Developer - Fisher Phillips, Atlanta, GA (Full-time, Hybrid)

- Designed and developed AI Agent using firm's platform and orchestration tools; integrated with internal application via API to support agent workflow
- Built and supported process automation using Workato, reducing manual toil by 200 hours/quarter
- Collaborated with stakeholders to gather requirements and define outcomes for agent development
- Automated data processing tasks using Python and secure programming practices
- Implemented data privacy and security measures in agent workflow

EDUCATION

Bachelor's degree in Information Technology, Fisher Phillips
